- Poor mental outlook
- Weak immune system
- Premature aging

Then arm yourself with the doctor-developed natural formula that gives you the nutritional firepower to help make a difference... Proxacine!

THE FUTURE OF ANTI-AGING IS HERE NOW... WITHOUT A PRESCRIPTION!

Proxacine is the doctor-developed natural formula that can nutritionally help you STOP Father time from robbing your body of its youthful vigor! How? With a potent and fascinating combination of proven super-nutraceuticals that combines not only nature’s top anti-aging defense nutrients, but also energizers and immune system protectors.
HERE’S WHY THIS FORMULA SHOULD BE A PART OF YOUR DAILY HEALTH PROGRAM

Morinda Citrifolia - (Noni)
This native plant of the tropics has been extensively used for over 2000 years! Yes, for many centuries herbalists have used it for joint stiffness, digestive distress, weak immune systems, and as a health tonic. Morinda Citrifolia is loaded with a nutritional treasure chest of phyto nutrients and vital enzymes, which energize and protect your body. Millions feel younger because of it…. It can work for you too!

Plant Protease-
This is one of the most important enzymes your body uses for the optimal digestion of protein (the building block for life). As your body ages it becomes less capable of utilizing this vital enzyme. As a result your body may find itself coming up short of the vital nutrients it needs to maintain supreme digestive, immune, and overall health. Without a good supply of this enzyme your body may not be able to get the life sustaining nutrients from the protein you consume. Your body is constantly regenerating and rebuilding itself to fight the effects of aging. This vital enzyme gives you outstanding nutritional power to help in the constant cellular rebuilding process. Why try to live without it?

DHEA-
As the body ages, levels of this natural hormone produced by your adrenal glands declines. DHEA is what your body uses as the foundation for making the sex hormones testosterone in men, and estrogen in women. Science tends to indicate that a decline of DHEA may contribute to the aging process in the body. DHEA is also being studied to see what effect it may play on helping joint stiffness, and in promoting better sexual health in men. DHEA…It helps you STOP rationing your passion!

N-Acetyl-L-Carnitine-
This is the amino acid that is needed by your body to convert fats into energy. Some of the highest levels of this amino acid are found in your heart, since it is the largest energy user of your body. It is absolutely essential for a healthy cardiovascular system. It also plays a role in helping to keep your mind sharp, and functioning at peak performance levels. It is a true hall-of-fame anti-aging nutrient that is vital for your health!

R-Lipoic Acid-
Lipoic Acid is one of the most potent and prolific antioxidant nutrients yet discovered! It protects your body from premature aging due to free radicals, and helps to cleanse the liver of toxins and waste. It has shown great promise for those people with weak immune systems, visual issues, and blood sugar and cholesterol concerns. This proven mega super-star nutrient should be in every body!!

Humic and Fulvic Acids-
Both of these are extremely nutrient-dense and are derived from rich organic soil. They are packed with over 70 naturally occurring minerals and many other trace elements. With today’s processed and fast food diets, many important minerals can be depleted from the body. Humic and Fulvic Acids help to guarantee that you do not put your body into a mineral shortage that could pose all sorts of health risks. They are of superb benefit to anyone seeking optimal health!

Meet Dr. James Chappell...
• A board certified Chiropractic Physician  • A Clinical Nutritionist
